

# IT'S SAFETY, SIMPLIFIED.

Area Wide Protective is a one-stop shop for municipalities with complex traffic control needs.

## Use your resources wisely.

Most municipalities have tight budgets, lean teams and limited resources for dealing with traffic control. Partnering with AWP improves safety, reduces accident liability and lets you focus on other activities.

## 3 Reasons to Choose AWP

We are THE experts in work zone safety and municipal traffic control.

- **SAFETY:** AWP has 49% fewer injuries than the industry average. That means better protection for your crews and community.
- **COVERAGE:** We show up when we say we will and work efficiently. In some cases, we use automated flagging assistance devices (AFADs) to cover more work with fewer people.
- **ACCURATE BILLING:** AWP tablet technology gives you a complete view of work before it starts. This helps you streamline payments and avoid overpaying.

SAVANNAH, GA

We are the exclusive traffic control partner for Savannah's Convention & Visitors Bureau, covering 60+ events annually at Enmarket Arena. Services include:

- Traffic control plans
- Custom signage
- Rideshare and public transit staging areas
- Traffic and pedestrian control

## Comprehensive Capabilities, Right Sized for You

AWP is nationwide, with local teams living and working right in your community. Local AWP branches are your primary points of contact, and quickly flex our capabilities to meet your specific needs.
